

POWERPOINT USAGE

This powerpoint is for your sole use to be used to educate your team. It can't be resold or copied and shared. It is OK to use in a class in person or online with your team members but not to be used in paid advertised class (I use these materials with paid ads on Facebook).

The power point is in editable format. You can move slides around or hide them if you don't want them to show in your presentation. To hide a slide in powerpoint go to the "Slideshow" tab and "Hide Slide" is one of the selections. Don't delete the slide. There is also a read only version.

I have 2 blank slides at the end so you can add slides if needed. Just hit "Duplicate slide" on the blank copies if you want more. I added an "About You" slide in the beginning and a "Connect With Me" slide at the end that you should fill in with your story/picture with your contact info and how to get oils.
